

FIXXUS VALUE

Option	Shutdown required?	Effect on corrosion?	Warranty on finish?	Chemical Resistant	Requires caulking	Improves Sanitation	Cost / SF
Paint	For paint to cure	None	None. Fades, cracks, peels	Minimal	Yes	No	\$2-10, varies widely
New Painted Panels	Yes, for demo and install	Covers up, creates vapor space	None	Varies	Yes	No	\$14-20, plus curb work and indirect
New Stainless Steel Panels	Yes, for demo and install	Covers up, creates vapor space	None	Except Chlorine, Bromine, Flourine, Iodine, and Asatine	Yes	No	\$20-30, plus curb work and indirect
Fiberglass	Yes, for install	Covers up, creates vapor space	Paint	Yes, except at breaks	Yes	No	\$2-4 plus installation and indirect
FIXXUS Systems	No	Stops corrosion	3 year standard	Highly chemical resistant	No, seamless	Yes	Pays for itself

FIXXUS FINISH

- High gloss finish drastically improves lighting in the work area
- High chemical resistance translates to zero staining
- Low fluid friction surface, sanitation water sheds *ultra quick*
- Insects, rodents, and bacteria have no place to hide

When a sanitation worker sees a clean, unstained, glossy white surface with no gaps or ledges, disinfecting and rinsing become very quick and easy.

Clients report that sanitation efforts (water, chemicals, labor) are reduced by around 50%. Sanitation crews love it.

Most important of all, FIXXUS finishes are engineered for quick installation. Shutdowns are ***not required*** for most projects, SAVING thousands (\$\$) in lost production that are the hallmark of many rehab projects.

FIXXUS is the most cost-efficient alternative when all direct and indirect costs are taken into account.

FIXXUS RESULTS

Elimination of product contamination liability with the FIXXUS process.

No more plastic, caulking, or USDA threats of stopping production.

Reduced sanitation efforts. Reduced labor \$\$, water usage \$\$, chemical usage \$\$, and water heating / disposal \$\$.

Improved aesthetics; a plant that customers, employees, and vendors hold up as best-in-class.

Increased longevity for facilities. Stopping water and air infiltration does more to prevent deterioration than any other maintenance activity.

Payback with our repair method. The longer it lasts, the more money is saved through the increased efficiencies.

THE FIXXUS PROMISE

Professional – We have more experience at this than anyone in the world.

We have a undeniable reputation of being safe, trustworthy and finishing on time.

Performance – The methods work. There is an undeniable 10 year case history. The method is guaranteed and backed by a single source vendor, ensuring production is uninterrupted and capital monies are not wasted.

Benefits – The methods do save tremendous sums of money when compared to other options. Along with eliminating indirect costs (lost production and ancillary work), the methods create new efficiencies that save labor, chemicals, water and energy.
